Select a device to learn the options to track attendance:

Click on the options below to choose the device to track class attendance for your classroom!

1. **Use an Apple device to:**
   - Call the roll and mark the attendance of each student.
   - Sign the students in by reading a QR barcode with the device's camera.
   - Sign the students in by swiping their ID card with a magnetic strip reader.
2. **Use a computer/laptop in the classroom to:**
   - Call the roll and manually mark absent/late students.
   - Sign the students in by reading a RFID/proximity reader. Have the students pass their RFID key fob over the RFID reader to record their attendance. (click here for ordering info.)
   - Sign-in station and have students sign in by swiping their student ID card in a magnetic strip reader or barcode reader. (click here for ordering info.)
   - Students can also type their ID number on the keyboard into a sign-in station to sign in for class.
3. **Use an Apple iPad or iPad mini mounted in a kiosk**
   - Have the students sign-in by reading a barcode with the iPad's front camera while keeping the device locked to display a classroom's scheduled courses through out the day in a tamper-free kiosk mode.

OR Learn now by choosing the attendance-recording METHOD you want to use.
